Website: zetdotcom.github.io

GitHub: github.com/zetdotcom

PROFILE

I am a passionate front-end developer with experience of designing, developing and optimizing complex web applications. Specializing in React and UI and UX. I am always positive and happy to learn new technologies and frameworks.

SKILLS

- HTML, CSS, JavaScript
- Responsive Web Design
- UI & UX Design
- Front-end build tools (NPM, Sass)

- ReactJS / Redux
- Git
- Unit Testing (Jest, Enzyme)
- REST API

EMPLOYMENT

SOFTWARE ENGINEER (WEB FRONT-END)

NCTECH IMAGING (JULY 2018 - PRESENT)

- Technologies: React, Redux, Redux Saga, Jest, Enzyme,
- Revamped UI and UX of an upcoming web application
- Restructured front-end architecture for scalability and maintainability
- Created a custom UI components library for internal applications and created a style guide
- Written unit tests for components library

FRONT-END DEVELOPER

FREELANCING (OCTOBER 2017 - PRESENT)

CHURCH COMMUNITY WEBSITE (www.jezuszyje.co.uk)
- Technologies: HTML5, CSS3, JS, React, Firebase
- Project description: Website developed alongside two other developers. It has become the main point of information for community events. It is also Progressive Web App what makes the website very accessible from mobile phone home screen.
- My role: mobile first approach UI/UX design, coding presentational components, website maintenance and updates

EMPLOYMENT

ELECTRIC MAP (electric-map-1515938108302.firebaseapp.com)
- Technologies: HTML5, CSS3, JS, React, Google Maps API
- Project description: Web app (PWA) showing electric car charging points across the UK with 'get directions' option
- My role: full development of the web app

SMG LEARNING (https://zetdotcom.github.io/smg-learning)
- Technologies: HTML5, CSS3, Sass, GatsbyJS
- Project description: Contract job to translate PSD design into HTML website (not responsive)

MATT WIELUNSKI PERSONAL TRAINER (no domain bought yet - check my portfolio projects section)
- Technologies: HTML5, CSS3, Sass, JS, React, GatsbyJS, Netlify
- Project description: Business website for Glasgow based personal trainer. Successfully connected WordPress CMS through REST API with React based front-end. This gives me the power of WP backend with freedom on the front-end.
- My role: full development of the website, from conception, to design to coding (website still in progress)
